FILM/VIDEO OPEN HOUSE

2/15/17 (1-3pm)

Our students focus on producing their own work in all three years of the major, both individually and in collaboration with their peers. The curriculum fosters our students' imagination, while aiding in the discovery of how their work fits into the larger context of creative art and industry practice. Students are exposed to a wide range of historical works, and to contemporary discourse on media theory and practice. Students learn the most up-to-date equipment and technology and can choose internships with local production companies.

Come explore the possibilities available in the moving image major. Ask questions of students, faculty & staff and see examples of student work & demos.
