

Basic Scanner Guide

1. Open the EPSON Scan App

by browsing through the application list.

2. This window may pop up.

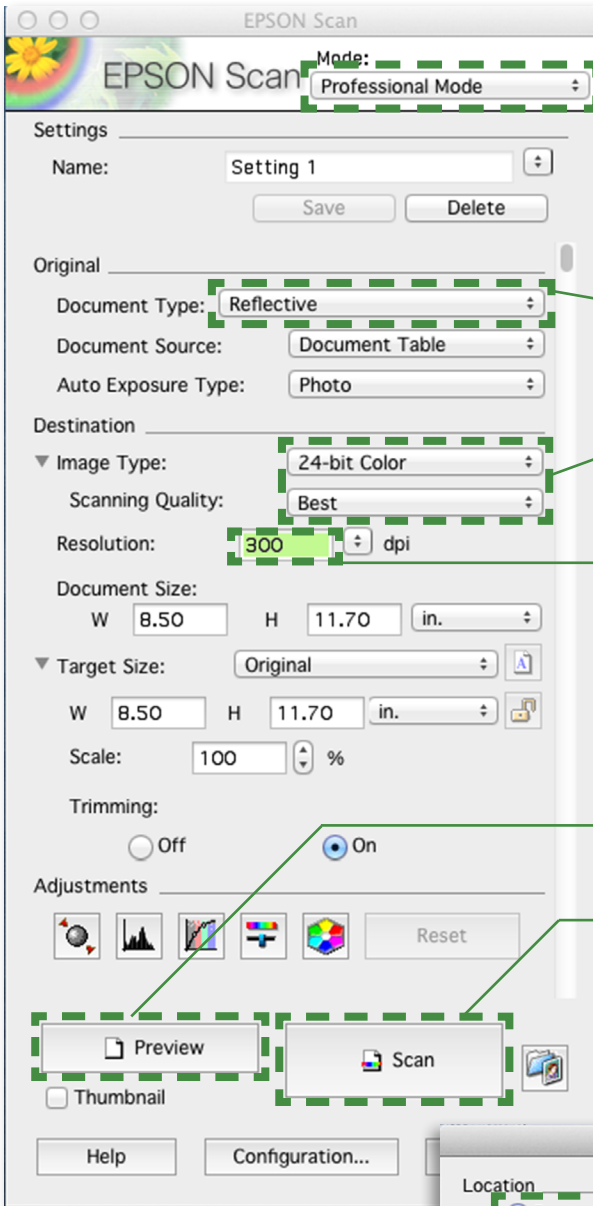

If you're using the **grey scanner**, select **EPSON Perfection 4490**.

If you're using the **black scanner**, select **EPSON Perfection V600**.

Then click **OK**.

3. The full application will launch. Follow this guide to learn to use recommended settings.

Use **Professional Mode**.

Select the **Reflective** type.

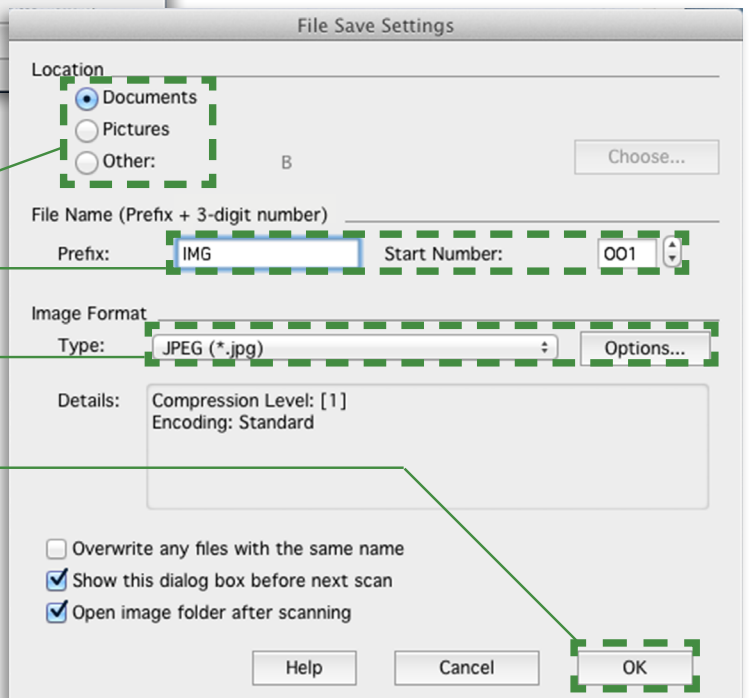

Set Image Type to **24-bit Color** and Scanning Quality to **Best**.

Adjust the Resolution here. **300 dpi** is a good high quality setting to start with.

Click here if you want to preview your scan.

Once you're ready click **Scan**.

4. After clicking **Scan**, the File Save Settings will open.

Select where you want to save your scan.

You can customize the prefix and its number for your scan here.

Select your output options: JPG, TIFF, PDF, etc. here.

When you're ready to scan, press **OK**.
